

RESILIENT/STURDY

# *model* 3290

## ALUMINUM FULL-VIEW DOORS

Flexibility, durability and quality make this a choice selection for your full-view needs. Removable inside retainers make changing the look of your door or replacing a window section an ease uncommon to most doors. Sections are assembled with through bolts at each vertical stile location for added strength and rigidity. A tongue-and-groove joint design insures a barrier against the elements while reinforcing the door's overall structure for your security.

10' x 7' full-view anodized aluminum sections

The Door to Quality.

## SPECIFICATIONS

- Clear anodized aluminum or white sections are 2 inches thick, and assembled with through bolts at each vertical stile location
- Section joints are tongue-and-groove
- Glass is installed with a flexible rubber gasket around all edges
- Insulated and 1/4" tempered glass is available in some sizes (*Call your distributor for quote*)
- Aluminum panels can be substituted for glass panels
- Glass or aluminum panels can be easily replaced by removing inside vinyl retainers
